EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Zilka (Reg. No. 41,429) on 01/10/2008.

The application has been amended as follows:

23. A system including a computer with a tangible computer readable medium for prioritized network security, the medium comprising:

logic for identifying a set of policies, each policy having a condition associated therewith;

logic for determining whether a user confirms activation of the policies;

logic for determining whether the conditions are met if the user confirms the activation;

and logic for activating the policies whose associated conditions are determined to be met;

wherein the conditions are based on a priority of the policy;

wherein a first policy with a higher priority has a first condition associated therewith that is different from a second condition associated with a second policy with a lower priority such that the first policy and second policy are activated under different priority-related conditions:

wherein the activation of the policies involves:

logic for adding the policies to a set of a plurality of active policies, and executing security actions associated with the active policies if associated limits are met; and

logic for identifying currently executed security actions, determining whether a conflict exists between the currently executed security actions, and resolving any conflicts between the currently executed security actions;

wherein the conditions are based on a time factor, the time factor including at least one of a timeframe, a predetermined time period, and a time limit;

wherein the conditions are based on a source of the policies;

wherein the conditions are based on a severity of security actions associated with the policies.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art teaches the concepts of activating policies based on various conditions and teaches general conflict resolution for policies. The prior art fails to teach two policies having different priorities being activated under different priority-related conditions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
